

To-Do List Application

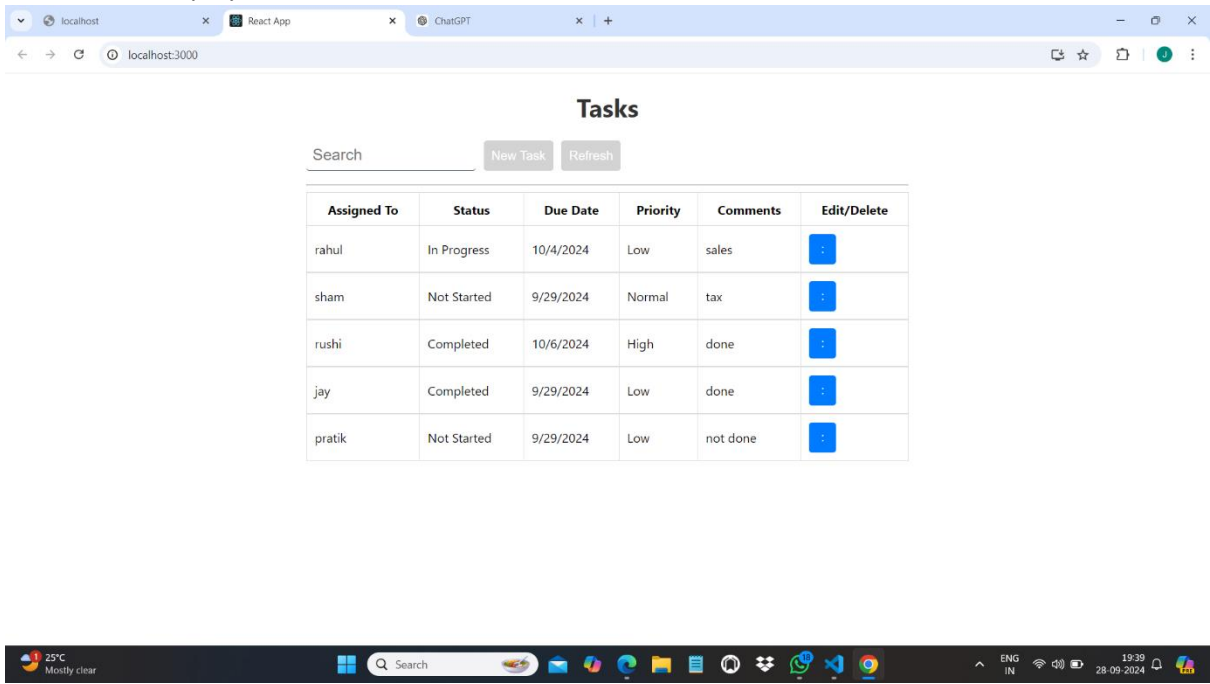

A simple and interactive To-Do list application built using React. This application allows users to add, edit, view, and delete tasks, ensuring efficient task management. The UI is designed to be user-friendly and responsive, utilizing Salesforce Lightning Design System (SLDS) and other CSS libraries for enhanced styling.

Features

- Add Task:** Add new tasks with a title and description.

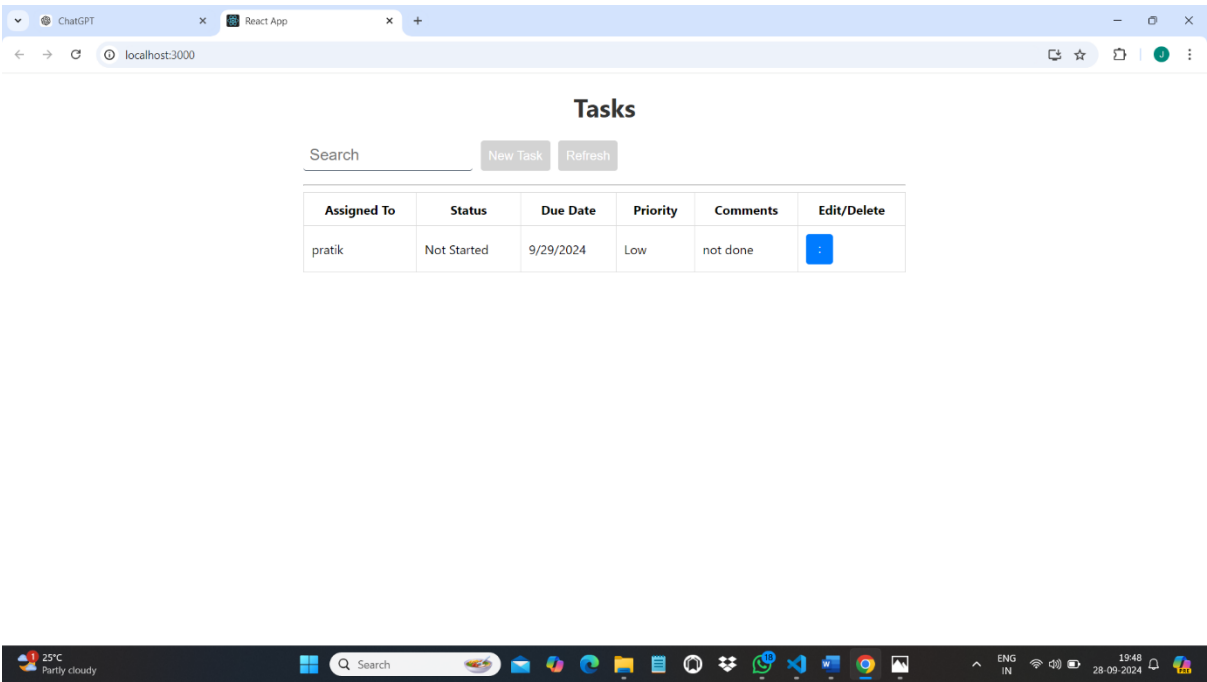

- View Tasks:** Display a list of tasks.

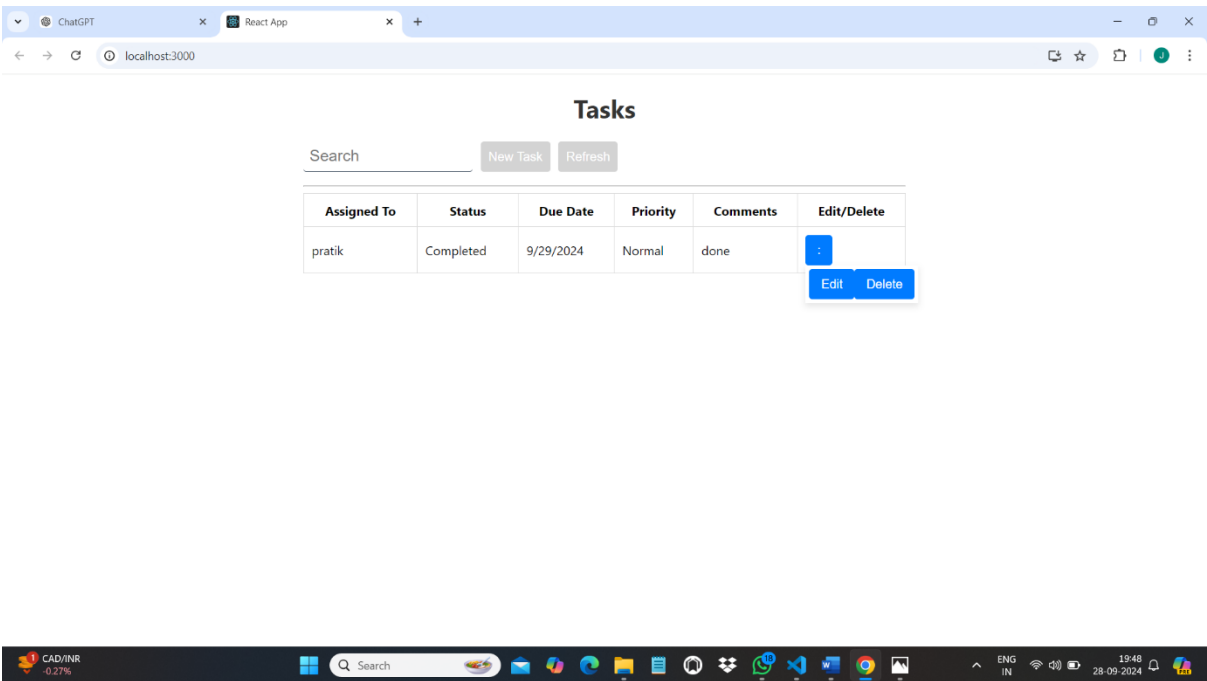

- **Edit Task:** Modify existing tasks.

Before edit

After edit

- **Delete Task:** Remove tasks from the list.
